Alon Mlievski

Front End / Full Stack Developer

👤 Profile

A marketing professional turned Full Stack Developer who likes to put colors on blocks of code. My main stack is JavaScript (ES6+), Typescript, React, Node, and MongoDB. As a Coding Academy Bootcamp graduate, I'm well-trained in building well-designed E2E web apps.

I come with varied experience from my past endeavors where I was a significant part of the companies I've worked at and helped them grow their revenue and clientele. I'm an organized, fast-learning autodidact, who's working great in a team, knowledgeable, and who's not afraid of taking challenges.
